

TECHNICAL BRIEF

Boomi AtomSphere: **A Scalable Platform for Growing Companies**

The need to connect and manage applications and data and automate processes is key to business growth. Ensuring data is accurate, timely, and accessible allows teams to move quickly and efficiently. An integration platform as a service (iPaaS) is the key to solving these challenges.

The Boomi AtomSphere Platform minimizes disruption, reduces risk, and allows teams to get more done faster.

Fast growing companies are increasingly understanding the need for application and data integration as a key component of their growth strategy. These businesses are feeling the strain of having multiple disparate data sources, an ever growing application landscape, and time consuming manual processes. These issues can be a real limitation to growth.

The need to connect and manage applications and data and automate processes is key to business growth. Further, ensuring data is accurate, timely, and accessible allows teams to move quickly and efficiently.

An integration platform as a service (iPaaS) is the key to solving these challenges. With an iPaaS, companies can trust that their data is connected, accurate, and accessible to the right people when they need it most. An iPaaS can free up time for teams like IT and Operations, as they no longer have to field requests for data and can focus on more business-critical initiatives. Investing in the right iPaaS provides the services needed to support fast-growing companies.

THE BOOMI ATOMSPHERE PLATFORM: SCALABLE. FLEXIBLE. EASY TO USE.

Boomi AtomSphere is the comprehensive iPaaS. Its powerful suite of data and application services delivers a complete application and data integration solution, that starts with Boomi's integration service that connects everything in your digital ecosystem, whether in the cloud or on-premises — really, wherever.

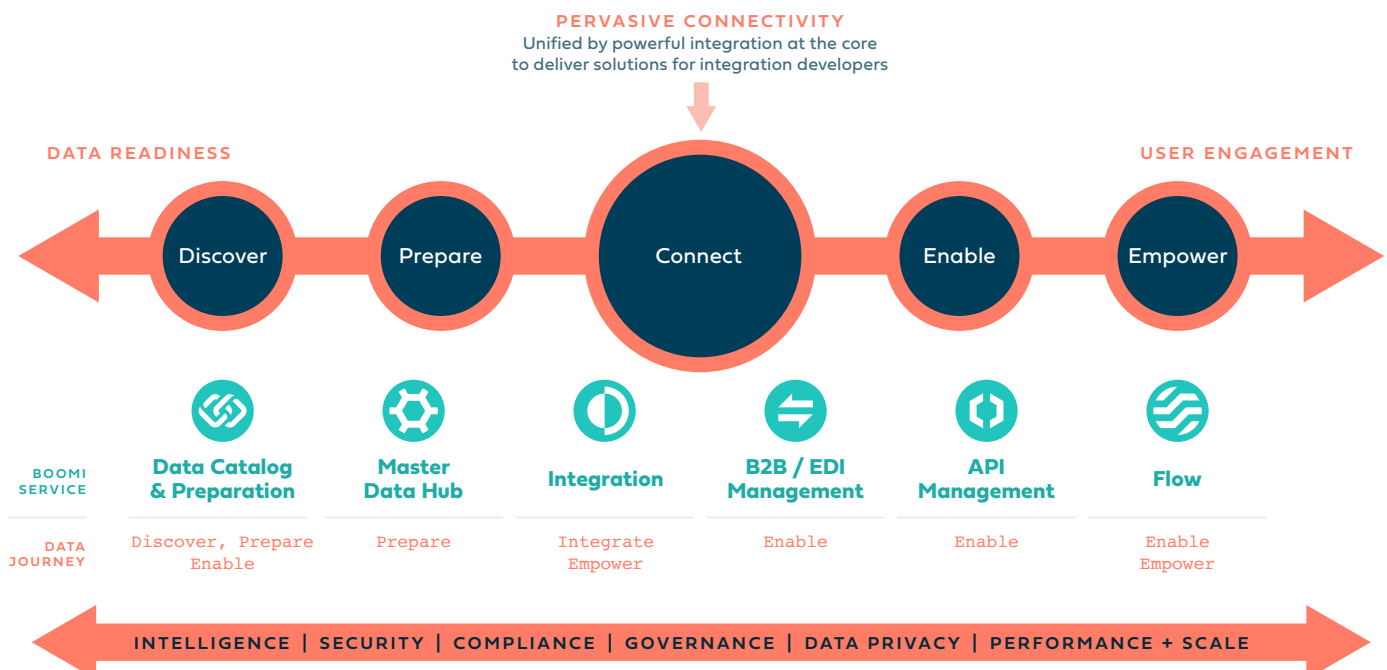

Leveraging a low-code UI and AI functions, the Boomi platform minimizes disruption, reduces risk, and allows teams to get more done faster. The connection between applications, databases, devices, and people is the foundation for critical functions such as data quality, business process automation, a single view of the customer, and more.

With the Boomi platform, you can quickly and easily discover and catalog your data; ensure data synchronization; integrate myriad applications, databases, and devices within your enterprise; extend connectivity across your partner ecosystem; design, secure and scale APIs, and build automated workflows that enhance human interaction with data.

BOOMI ATOMSPHERE PLATFORM SERVICES

- **BOOMI INTEGRATION:** Break down data silos to enhance information flow across applications and infrastructure, at any scale.
- **BOOMI MASTER DATA HUB:** Synchronize and enrich data to provide trusted, consistent information across all systems.
- **BOOMI API MANAGEMENT:** Easily create, publish and manage any endpoint as an API, on-premises or in the cloud.
- **BOOMI FLOW:** Quickly build automated workflows that streamline administrative and citizen-facing processes.
- **BOOMI B2B/EDI MANAGEMENT:** Rapidly onboard suppliers and other partners, and monitor all interactions through a centralized portal.
- **BOOMI DATA CATALOG AND PREPARATION:** Discover, prepare, and catalog actionable data across all information sources.

Boomi AtomSphere Platform

THE POWER OF A CLOUD-NATIVE PLATFORM

Leveraging the power of the cloud, Boomi provides all the benefits of the cloud, including flexibility, agility, design patterns, scalability, high availability, built-in redundancy, and automatic upgrades. Eliminate massive capital costs and the complexities of maintaining software on-premises, and ensure all customers automatically benefit from the latest features and functionality. Through the breadth and depth of the Boomi AtomSphere Platform, we help you get to market faster, operate more efficiently, and differentiate.

ABOUT BOOMI

Boomi instantly connects everyone to everything with its cloud-native, unified, open and intelligent platform. Boomi's integration platform as a service (iPaaS) is trusted by more than 20,000 customers globally for its speed, ease-of-use, and lower total cost of ownership. As the pioneer at fueling intelligent use of data, Boomi's vision is to make it quick and easy for customers and partners to discover, manage, and orchestrate data, while connecting applications, processes, and people for better, faster outcomes.

WHY BOOMI?

INTEGRATION & CONNECTIVITY

- Dramatically cut the time and cost of integration
- Implement integration projects in days or weeks, not months
- Gain real-time insights across the business
- Reorient core processes around the customer
- Improve data quality and consistency
- Flexibly scale and adapt to business needs

CLOUD-BASED

- No hardware to install or maintain
- Automatic upgrades
- Predictable usage-based pricing
- Single instance, multi-tenant architecture
- Accessible from any browser

ROBOT INTEGRATION

- Proven connectivity to 1,500+ unique endpoints, including 200+ applications
- Drag-and-drop integration development, no coding required
- Any-to-any integration across cloud and on-premises systems
- Intuitive, centralized integration management
- Community access to connectors, widgets, and process maps
- Extensive crowd-sourced knowledge and guidance
